Public readers, source scans, and repair manifest - 2026-05-28

Start here

This packet replaces the earlier public-reader index with actual page counts, repairs the broken Yang Hui Arabic reader, regenerates the combined Arabic and modern Chinese readers, and adds the first supplied bundle of actual source scan PDFs. The modern LaTeX readers remain working-draft transcriptions or translations; the source-scan folder contains the original PDF witnesses supplied in pdfs1.zip.

Important gap: this packet contains the first source-scan ZIP only. It includes Bhaskara II Bijaganita source-scan parts 1-5 of 9; parts 6-9 are expected from the second source-scan ZIP.

Top-level folders

Folder	Purpose
public-readers/	66 direct reader PDFs with updated index and repaired/rebuilt combined readers.
source-scans-pdfs1/	15 actual source scan PDFs from the first supplied source-scan ZIP.
patched-sources/	The TeX body, wrapper, and logs for the Yang Hui Arabic part 1 repair.
reports/	CSV/JSON manifests, page counts, checksums, and repair notes.

Actual source scan PDFs supplied in pdfs1.zip

These files are included as direct PDFs in source-scans-pdfs1/. Filenames have been normalized to ASCII for portability; the manifest preserves the original ZIP member names and SHA-256 hashes.

Repairs in this pass

- Rebuilt 30-03 Arabic Translation - Yang Hui - Xiangjie, part 1.pdf from TeX with explicit Chinese and Arabic fonts; visible color-control text leakage is gone.
- Regenerated 03 Combined Arabic Translation Drafts.pdf so it uses the repaired Yang Hui reader; page count is now 282.
- Regenerated 02 Combined Modern Chinese Renderings.pdf from the clean 20-series files; page count is now 467.
- Replaced stale index page counts with counts read from the actual PDFs in this packet.
- Added source-scans-pdfs1/ so readers can be checked against supplied source PDFs, not only generated LaTeX renderings.
- Generated public_reader_manifest.csv/json, source_scans_pdfs1_inventory.csv/json, and SHA256SUMS.txt.

Remaining known gaps

- Second source-scan ZIP is not present in this session; Bijaganita source-scan parts 6-9 of 9 are therefore not included here.
- Chinese source scans were not in pdfs1.zip; the Chinese files here remain modern LaTeX renderings rather than scan witnesses.
- The non-Latin generated readers are readable enough for checking but should still receive a human visual pass before final archival publication.
