

SGA 5 – Complete English Working Draft

Dualizing complexes, Lefschetz formulas, local terms, J-adic systems, and the beginning of
l-adic cohomology

This reader assembles the currently delivered SGA 5 English working translation into a single checking file. It combines Expose I through section 2, the completion of Expose I together with Expose III and III B through II.5.10, and the continuation from after III B II.5.10 to the end of SGA 5. The original French reference PDF and the source TeX/render-check packages are included separately in this record.
