

Apparatus: physical page 1 / printed 58

Content anchor. Exposé IV; title, byline, redactor credit, and opening.

Authority. Controlling 22-page scan; page aggregate prefix F87AD9CC6AB7C928.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C001: physical 1 / printed 58, title.
- C002: physical 1 / printed 58, opening paragraph.
- C037: physical 1 / printed 58, opening and bibliography orthography.

Apparatus: physical page 2 / printed 59

Content anchor. Section 1 and Proposition 1.1.

Authority. Controlling 22-page scan; page aggregate prefix FCC032A1D60FBFAE.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C003: physical 2 / printed 59, Proposition 1.1(a).
- C004: physical 2 / printed 59, tangent-bundle display.
- C005: physical 2 / printed 59, Euler formula.

Apparatus: physical page 3 / printed 60

Content anchor. Corollary 1.2; paragraph 1.4; Proposition 1.5.

Authority. Controlling 22-page scan; page aggregate prefix 12EEFDBB1D1D2BD9.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C006: physical 3 / printed 60, paragraph 1.4 and following statement.
- C057: physical 3 / printed 60, universal-coefficients exact sequence.

Apparatus: physical page 4 / printed 61

Content anchor. Proof of Proposition 1.5.

Authority. Controlling 22-page scan; page aggregate prefix 9FB16D907D05437B.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C038: physical 4 / printed 61, formal hull objects.

Apparatus: physical page 5 / printed 62

Content anchor. Theorem 1.6 and Corollary 1.7.

Authority. Controlling 22-page scan; page aggregate prefix 6CF4B279F924DE68.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C007: physical 5 / printed 62, principal result and first consequence.
- C039: physical 5 / printed 62, obstruction subscheme and line bundle.

Apparatus: physical page 6 / printed 63

Content anchor. Corollaries 1.8 and 1.10; Remark 1.9.

Authority. Controlling 22-page scan; page aggregate prefix E2E4960D7A0E2813.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C008: physical 6 / printed 63, consequences.
- C009: physical 6 / printed 63, transition from 1.7 to 1.8.
- C010: physical 6 / printed 63, Remark 1.9(b).

Apparatus: physical page 7 / printed 64

Content anchor. Corollary 1.10 closes; Section 2 begins.

Authority. Controlling 22-page scan; page aggregate prefix 51F19D76ED1E0300.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C011: physical 7-8 / printed 64-65, source paragraphs.
- C012: physical 7-12 / printed 64-69, numbered displays.
- C058: physical 7 / printed 64, paragraph 2.1 and display (2.1.2).

Apparatus: physical page 8 / printed 65

Content anchor. Proposition 2.2; Gauss–Manin setup.

Authority. Controlling 22-page scan; page aggregate prefix F9F742BEF922BEA7.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C013: physical 8 / printed 65, statement after (2.1.3).
- C059: physical 8 / printed 65, proof of Proposition 2.2.
- C060: physical 8 / printed 65, paragraph 2.3.
- C061: physical 8 / printed 65, Katz–Oda citation at page foot.

Source anomaly preserved. The authority prints empty brackets after Katz–Oda on this page; the English reader does not silently supply a bibliography number.

Apparatus: physical page 9 / printed 66

Content anchor. Crystal interpretation and Hodge filtration.

Authority. Controlling 22-page scan; page aggregate prefix BFEC3CCEBAA5A8E8.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C040: physical 9 / printed 66, crystalline family notation.

Apparatus: physical page 10 / printed 67

Content anchor. Griffiths transversality and Kodaira–Spencer.

Authority. Controlling 22-page scan; page aggregate prefix 3F253676479C5CCD.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C014: physical 10 / printed 67, target after (2.3.10).

Apparatus: physical page 11 / printed 68

Content anchor. Proposition 2.4 and proof.

Authority. Controlling 22-page scan; page aggregate prefix 86D38EC744D2D22C.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C015: physical 11 / printed 68, mobility statement.
- C054: physical 11 / printed 68, opening proof of Proposition 2.4.

Apparatus: physical page 12 / printed 69

Content anchor. Corollary 2.4.4 and Frobenius setup.

Authority. Controlling 22-page scan; page aggregate prefix 4113F910D974A504.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C016: physical 12 / printed 69, corollary after (2.4.3).
- C017: physical 12 / printed 69, diagram (2.5.1).
- C041: physical 12 / printed 69, relative Frobenius prose.
- C042: physical 12 / printed 69, Cartesian Frobenius diagram.

Apparatus: physical page 13 / printed 70

Content anchor. Proposition 2.6 begins.

Authority. Controlling 22-page scan; page aggregate prefix 375F71AC2B62180A.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C018: physical 13 / printed 70, Proposition 2.6.
- C019: physical 13 / printed 70, display (2.6.1).
- C043: physical 13 / printed 70, Mazur-Ogus reduction.

Apparatus: physical page 14 / printed 71

Content anchor. Proposition 2.6 closes; Remarks 2.7.

Authority. Controlling 22-page scan; page aggregate prefix 14917591F2060C46.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C020: physical 14 / printed 71, remarks following Proposition 2.6.
- C021: physical 14 / printed 71, display (2.7.1).
- C022: physical 14-15 / printed 71-72, Remark 2.7(b).
- C044: physical 14 / printed 71, equation (2.7.1).

Apparatus: physical page 15 / printed 72

Content anchor. Crystalline Chern class construction.

Authority. Controlling 22-page scan; page aggregate prefix 1EE369EDFF15EA24.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C023: physical 15 / printed 72, display (2.8.1).
- C045: physical 15 / printed 72, Fil^1 and Chern-class domain.
- C046: physical 15 / printed 72, logarithm series.

Apparatus: physical page 16 / printed 73

Content anchor. Proposition 2.9.

Authority. Controlling 22-page scan; page aggregate prefix FFE7EDDC769F214B.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C024: physical 16 / printed 73, Proposition 2.9.
- C047: physical 16 / printed 73, Proposition 2.9.

Apparatus: physical page 17 / printed 74

Content anchor. Remark 2.9.5 and paragraph 2.10.

Authority. Controlling 22-page scan; page aggregate prefix C14C05A85C6341FC.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C025: physical 17 / printed 74, opening statement.
- C026: physical 17-18 / printed 74-75, paragraphs 2.10 and 2.11.
- C048: physical 17 / printed 74, Katz-Oda calculation and base-change square.

Apparatus: physical page 18 / printed 75

Content anchor. Proof of 1.6; Appendix opening.

Authority. Controlling 22-page scan; page aggregate prefix EFAD9F7A554D1622.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C027: physical 18 / printed 75, Appendix heading and footnote.
- C028: physical 18 / printed 75, cycle-class notation.
- C049: physical 18 / printed 75, proof of 1.6 class assignment.
- C050: physical 18 / printed 75, relative Hodge spaces.

Apparatus: physical page 19 / printed 76

Content anchor. Cycle classes; Proposition 3.2.3.

Authority. Controlling 22-page scan; page aggregate prefix 27ABDD87381C0F77.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C029: physical 19 / printed 76, paragraph 3.2.

Apparatus: physical page 20 / printed 77

Content anchor. Proof of 3.2.3; Theorem 3.3.

Authority. Controlling 22-page scan; page aggregate prefix B430148AD7505777.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C030: physical 20 / printed 77, proof of 3.2.3.
- C031: physical 20 / printed 77, logarithmic de Rham construction.
- C032: physical 20 / printed 77, proof of Theorem 3.3.

Apparatus: physical page 21 / printed 78

Content anchor. Paragraph 3.4; Remark 3.5; addresses.

Authority. Controlling 22-page scan; page aggregate prefix D9BBADB5AB9BA0D7.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C033: physical 21 / printed 78, paragraph 3.4 and after (3.4.2).
- C034: physical 21 / printed 78, Remark 3.5.
- C035: physical 21 / printed 78, terminal addresses.
- C052: physical 21 / printed 78, paragraph 3.4 parenthesis.
- C062: physical 21 / printed 78, P. Deligne institutional address.

Apparatus: physical page 22 / printed 79

Content anchor. Bibliography and physical EOF.

Authority. Controlling 22-page scan; page aggregate prefix 3A2BC160D37ED9C6.

Reader disposition. The diplomatic French reader is an exact authority facsimile. The English unit was independently re-audited against this page; source-native statement/display numbering, formulas, arrows, and formal-family underlining were checked. Running folios and synthetic source-address headers are not reader prose.

Accepted page-local corrections.

- C036: physical 22 / printed 79, bibliography and boundary.
- C053: physical 22 / printed 79, English section heading.
- C055: physical 22 / printed 79, bibliography [12] and [14].
- C056: physical 22 / printed 79, standalone English bibliography heading.
- C063: physical 22 / printed 79, bibliography [1]-[16].

Bibliographic disposition. Entry wording, accents, author separators, number notation, punctuation, and range hyphens follow the printed bibliography; only the section heading is translated.
