1 Introduction

The Foundation Programme in Literacy, Numeracy and Skills uses a thematic approach and is driven by competencies. A key feature of the thematic approach is that it allows the teaching and learning process to tap on contextual knowledge familiar to learners and allows the construction of concepts from known to unknown. Students get the opportunity to appreciate the immediate relevance of the concepts they are learning. They, for instance, learn measurement concepts because they need it for their construction work or for preparing a dish. The thematic approach allows students to learn by necessity.

Three themes have been chosen for the first term of 2024 by grade level (see Table below)

Grade 7	Grade 8	Grade 9
Welcome to School	Road Safety	Les métiers - Sports
Weather	Weather	Les métiers- La cuisine
Patriotism	Patriotism	Patriotism

2 Key aspects of Theme 1- Welcome to School

The thematic approach gives educators much flexibility to develop particular competencies, in line with the capabilities of the students. It allows students to see the relevance of concepts across subject areas. The technical team has chosen ‘Welcome to School’ as the first theme to be developed in Grade 7 in January 2025. This theme is pertinent as the students are transiting to new environment where they will study different subjects and will be working with different teachers. The theme ‘Welcome to school’ provides various opportunities to develop different competencies such as vocabulary acquisition, sentence construction, life skills, numeracy among others. The table below provides an example to show how concepts can be simultaneously acquired across the languages.

Literacy: Some suggestions

English	French	Kreol Morisien
welcome	bienvenue	bienveni
Good morning sir	Bonjour monsieur	Bonzour misie
Good morning madam	Bonjour madame	Bonzour madam
Good bye sir	Au revoir monsieur	Orevwar misie
Good bye madam	Au revoir madame	Orevwar madam
Thank you	merci	Mersi
The rector	Le recteur/rectrice	Rekter/rektris
Teacher	professeur	profeser
college	Collège	Kolez
Morning assembly	L'assemblée du matin	Lasanble gramatin
classroom	classe	Klas
toilets	toilette	twalet
playground	Terrain de jeu	Terin pou zwe
Specialist rooms	Les salles spécialisées	Lasal spesialize
Head of departments	Responsable de departement	Responsab departman
Head of section	Responsable de section	Responsab seksion
Non-teaching staff	Personel de soutien	Personel soutien
The bell rings	La cloche sonne	Laklos sone
Days of going to school	Les jours ou nous allons à l'école	Bann zour kot al lekol
Visit the school	Visiter le collège	Vizit nou kolez
Food canteen	La cantine	lakantinn
School rules and regulations	Les lois au collège	Bann lalwa ki ena dan kolez

From this list of vocabulary acquisition, what can be done?

- Sentence building in the 3 languages
- Matching exercises (pictures and words where possible)

- Writing the words from memory
- Displaying list of words done by students in class
- Knowing the name of all teachers who will work with them
- Knowing the names of all friends in class
- Making a slam on their new school

"Welcome to School"

1. Literacy

Objective: Develop students' speaking, listening, reading, and writing skills through school-related activities and reflections.

Activities:

- **Reading:** Share stories about the first day of school, such as "*Ti Zafan dan lekol*" (a local story) or books with characters' familiar to Mauritian children.
- **Writing:** Have students write about their favorite part of Mauritius or their excitement about school.
- **Speaking & Listening:** Encourage students to introduce themselves in English, French and Kreol, sharing their names, favorite foods, or places.

2. Numeracy

Objective: Apply math skills in school-related activities through numbers, patterns, and time.

Activities:

- **Counting:** Count classroom supplies (e.g., pencils, books) and track the number of days until a school event (e.g., field trip or class assembly). This helps students practice counting and numeracy.
- **Patterns:** Use school-related objects like crayons, books, or shapes to explore patterns, such as repeating colors or shapes, integrating hands-on learning with math.

- **Time:** Learn about the school schedule and read clocks to understand time management. Students can create a visual timetable for their school day, reinforcing their ability to tell time and plan their activities.
- **Money (optional):** Introduce basic currency (Mauritian rupees or equivalent) and teach students about the cost of school supplies, reinforcing basic financial literacy.

3. Lifeskills and Values

Objective: Develop students' understanding of school rules, community roles, and social values.

Activities:

- **Classroom Map:** Have students create a simple map of the classroom or school, labeling key areas like the library, playground, and canteen. This promotes spatial awareness and understanding of the school environment.
- **Community Roles:** Discuss the roles of **teachers**, **students**, and **staff members** in the school community. This can lead to an exploration of **respect**, **responsibility**, and **teamwork**.
- **Rules:** Develop classroom rules together and discuss why rules are essential for a safe and enjoyable learning environment. Emphasize the importance of following rules both in and outside of school.
- **Values Education:** Introduce basic values such as **respect**, **honesty**, and **cooperation**, and encourage students to relate these values to their everyday experiences at school.

4. Art and Design

Objective: Foster creativity and self-expression through school-related themes.

Activities:

- **Drawing:** Have students draw their favorite parts of the school or their first day of school, allowing them to reflect creatively on their school experience.
- **Crafting:** Create "**Welcome to School**" banners or posters to decorate the classroom. Use vibrant, welcoming colors to engage students in Visual Arts while preparing for the new school year.
- **Coloring:** Use school-related images for coloring activities (e.g., school bus), allowing students to practice fine motor skills while exploring school-related themes.

5. Physical Education and Health

Objective: Encourage physical activity, cooperation, and social interaction through games and movement.

Activities:

- **Team Games:** Play games that promote cooperation and teamwork, such as **relay races** or **circle games**. These activities build teamwork, communication, and trust among students.
- **Movement:** Introduce simple activities to familiarize students with the school playground. Discuss the importance of being active and healthy while having fun.
- **Following Instructions:** Practice listening to and following instructions through physical activities like "Simon Says" or **obstacle courses**, reinforcing attention to detail and discipline.
- **Teamwork:** Organize team-building games where students must work together to achieve a common goal, emphasizing communication, respect, and collaboration.

6. Music

Objective: Engage students through rhythm, song, and sound.

Activities:

- **School Songs:** Teach a simple "**Welcome to School**" song or other songs related to school life. Students can sing along and explore the rhythm and melody of school-related music.
- **Rhythm:** Use clapping or tapping to practice rhythms in school-related songs, allowing students to develop their musical timing and coordination.
- **Instruments:** Introduce basic instruments such as **tambourines**, **rhythm sticks**, or **hand drums**, and have students play along to songs, introducing the concept of musicality and sound creation.
- **Music and Movement:** Incorporate dance or movement to the rhythm of the songs, helping students explore how music and physical movement can work together.

7. Scientific Literacy

Objective: Explore the natural environment and understand the scientific aspects of nature.

Activities:

- **Observing Nature:** Go on a nature walk around the school to observe local plants, animals, and the environment. Students can take notes or sketch their observations, linking science to real-world experiences.
 - **Planting:** Start a simple **school garden** project, where students can learn about plant growth, responsibility, and the scientific method. Discuss the needs of plants (water, sunlight, soil) and observe changes over time.
 - **Weather:** Discuss the weather and how it affects outdoor play and school events. Introduce basic concepts like rain, temperature, and sunshine, and have students observe weather patterns during the week.
 - **Recycling:** Teach students the importance of **recycling** and how it benefits the environment. Discuss local initiatives in Mauritius related to environmental sustainability.
-

Integration of Cross-Curricular Elements:

- **Literacy:** Students practice speaking, listening, reading, and writing in **English, French, and Kreol Morisien**, fostering language development while discussing school-related themes.
- **Numeracy:** Through counting, patterns, time, and money, students apply **mathematical** concepts to their daily school life.
- **Lifeskills & Values:** The activities in this section focus on building students' **social skills, community awareness**, and the importance of **values** like respect, cooperation, and responsibility.
- **Digital Literacy:** Technology tools (e.g., digital presentations, interactive maps) are used to enhance learning and creativity.
- **Arts and Music:** Students explore creative expression through **drawing, crafting, and singing**, linking art and music to the school experience.

- **Physical Education and Health:** Students engage in **physical activities** that encourage movement, teamwork, and listening skills, contributing to their **overall well-being**.
- **Scientific Literacy:** Exploration of the local environment and scientific principles, including **weather patterns, plant growth, and recycling**, connects students with the natural world around them.

This cross-curricular approach to the "**Welcome to School**" theme integrates core academic subjects with social, creative, and scientific learning, encouraging students to connect with their school environment in a meaningful and enjoyable way.

Other suggestions

Since the students will study different subjects and are required to be independent compared to the primary school setting, they should be able to interpret a timetable. Thus, numeracy fits in with the concept of time (clockface and calendar) as shown in the schema below:

Students can also prepare a birthday calendar where birthdays of all students are recorded (this can be done alongside with ICT and Visual Arts, 3 subjects working together)

Scientific Literacy

shutterstock.com · 1249140265

PAPER HELICOPTER

Windvane

Cardboard / carton
Straw
Paper
Pencil / wooden rod
Pin / thumb tack

Anemometer

Paper cups
Wooden rods
Masking tape
Plastic container
Cardboard / carton

ICT

From what has been done in Numeracy, students can make

- A birthday calendar done on computer using MS paint or any program
- A spreadsheet on computer to record the statistics

Visual Arts

- Sketch/draw the school
- Make a colourful birthday calendar
- Make a colourful maquette of the school with scrap materials (Design and Technology department can help)
- Party in class with decoration, bring snacks and juice and share a moment with the students.
- Design a name tag

Myself

Activity: Making a desktop name tag using card

Description of Activity

Students will use card to make a simple name tag which will be placed on their desks. The name of the student will be written on the tag. This can be hand-written, word processed or done using stencils/templates. Students will be free to add other information as well. Graphics will also be included on the name tag. Students can draw directly on the name tag. They can also cut graphics/pictures from magazines or use printed materials and glue them on the tag.

Materials/Equipment required

Card/Bristol paper/packaging boxes
Pencil
Glue
Scissors
Markers
Coloured pencils
Ruler

Through this theme the teacher will be able to:

- Discover the likes and dislikes of students through the different activities
- Identify what students appreciated the most in the theme
- Record the level of participation of students

Sample 'Student Progress Card' after completing the theme

Name of student.....

	Not Attained	Partially Attained	Attained
Is able to count			
Is able to repeat words			
Is able to write words			
Knows the name of teachers			
Knows the name of friends in class			
Can write his/her name correctly			
Is aware of school rules			
Can respect school rules and abide to			
Can copy correctly			
Can respond to instruction			

Other activities

Activity: Making a container box for the storage of materials and equipment which are used in class.

Description of Activity

The aim of this activity is to make pupils aware of the importance of safe storage of materials (papers, posters, etc.) and equipment (pens, markers, coloured pencils, etc.) while involving them in hands-on activities. Students will make container boxes to store various types of items which they commonly use in their class. They can make compartmentalized boxes or individual boxes to store each item. These boxes can be constructed using card, MDF or any other suitable material. Packaging boxes (shoe boxes, cereal boxes, milk cans) can be re-used as well.

Materials required

Card/MDF/Used packaging boxes
Glue
Staples

3 Key aspects of Theme 2 - Weather

The theme ‘Weather’ was chosen by the Technical Team as it is directly relevant to the day-to-day experiences of the students and also cyclones are common in the first school term. This theme provides opportunities to construct a range of daily-life concepts, consolidating literacy and numeracy skills, scientific literacy, digital literacy and life skills. Students will be engaged with concepts such as climate change and can understand climatic phenomena across the globe.

English	French	Kreol Morisien
weather	le temps	letan
flood	inondation	inondasion
cyclone	cyclone	siklonn
drought	la secheresse	lasesres
tsunami	tsunami	sounami
rainfall	la pluie	lapli
sky	le ciel	lesiel
wind	le vent	divan
sun	soleil	soley
cloud	nuage	niaz
windy	venteux	ena boukou divan
sunny	ensoleillé	ena soley
cloudy	nuageux	enn niaz
thunder	tonnerre	loraz
meteorological station	station de la météo	meteo
cyclonic months	les mois cyclonique	bann mwa kot ena siklonn
weather forecast	prévisions météorologique	bann previzion letan

From this list of vocabulary acquisition, what can be done?

- Sentence building in the 3 languages
- Students relate what they do during cyclones. Story telling
- Writing the words from memory
- Display list of words done by students in class
- Write the 12 months of the year, then identify the cyclonic months

What to learn in mathematics?

- Identify curve lines, dotted lines on a meteorological map
- Identify, sketch and draw horizontal and vertical lines
- Students are able to sketch free hand curve lines, dotted lines, straight lines, inclined lines
- Students are able to draw straight lines (according to required length e.g., in cm) and inclined lines

What to learn in ICT?

From what has been done in Numeracy, students can draw the different lines on the computer using specific program (Ms Paint)

What to learn in Art and Design?

Trace the world map, the different continents and colour them

Trace different maps of countries (Mauritius, Reunion, Seychelles, Madagascar, Rodrigues...)

"Weather in Mauritius"

1. Literacy

Objective: Develop reading, writing, speaking, and listening skills using weather-related vocabulary and stories.

Activities:

- **Reading:** Read stories or articles about the weather in Mauritius, such as tropical storms or sunny days. Example: Articles about cyclones or books like "**The Storm**" by **Jean-Marie Le Clézio**.

Discuss weather vocabulary in **English, French, and Kreol Morisien**.

- **Writing:** Have students write about their favorite type of weather in Mauritius (e.g., sunny, rainy) or how they prepare for a cyclone. Encourage descriptive writing with attention to details about sensory experiences in different weather conditions.
- **Speaking & Listening:** Discuss how weather patterns affect daily life in Mauritius, including seasonal changes like **summer rains** and **dry seasons**. Allow students to share personal experiences or memories related to weather, using **English, French, or Kreol Morisien** to express themselves.

2. Numeracy

Objective: Use weather data to explore measurement, data collection, and patterns.

Activities:

- **Temperature Charts:** Track daily temperatures in Mauritius over a week, graphing highs and lows. Students can create **temperature charts** or digital graphs using simple tools like **Excel** or **Google Sheets** to visualize data.
- **Rainfall Measurement:** Create simple **rain gauges** to measure rainfall. Students calculate and record the amount of rainfall over the week, and later analyze this data to understand local weather patterns.
- **Data Interpretation:** Use the collected weather data to create **bar graphs** or **pie charts** that represent the frequency of different types of weather observed (e.g., sunny, cloudy, rainy days).

3. Lifeskills and Values

Objective: Understand how weather influences daily life and local culture in Mauritius.

Activities:

- **Cyclone Preparedness:** Discuss the role of **cyclones** in Mauritius and the steps people take to prepare. Introduce local protocols and safety measures such as **evacuation routes**, **staying indoors**, and **emergency kits**.
- **Farming and Weather:** Explore how the **weather** affects **agriculture** in Mauritius, especially crops like **sugarcane**, **tropical fruits**, and the seasonal growth of plants.
- **Climate and Tourism:** Discuss how the tropical climate in Mauritius attracts **tourists** and its impact on the economy. Students can explore how certain seasons (e.g., the rainy season) influence tourism and how the weather plays a role in popular tourist activities.

4. Art and Design

Objective: Express creativity by illustrating weather patterns and related themes.

Activities:

- **Weather Drawings:** Have students draw their interpretation of different weather conditions in Mauritius. Students could represent **sunny beaches**, **tropical rain**, or the **cloudy sky before a cyclone**. Encourage creativity while incorporating weather symbols.
- **Collage:** Use **magazine cut-outs**, **natural materials**, or digital tools to create a **collage** representing weather in Mauritius (e.g., sun, clouds, rain, cyclone). This activity allows students to learn about the artistic representation of nature.
- **Weather Symbols:** Introduce common weather symbols (e.g., sun, clouds, raindrops) and have students design their own symbols for different types of weather.

5. Physical Education and Health

Objective: Learn about outdoor activities and how weather affects them.

Activities:

- **Weather and Sports:** Discuss how different weather conditions in Mauritius (e.g., rainy season, hot sunny days) affect **outdoor sports** and **games**. This could include activities like soccer, swimming, or beach games.
- **Outdoor Play:** Encourage outdoor physical activities on sunny days (e.g., running or playing games), and discuss **appropriate clothing** or **safety measures** for hot or rainy weather (e.g., wearing sunscreen, using umbrellas).

6. Music

Objective: Explore sounds and rhythms related to weather.

Activities:

- **Weather Sounds:** Use instruments like **drums**, **maracas**, or **rainsticks** to mimic the sounds of **rain**, **wind**, and **storms**. Students will explore rhythm and sound to represent weather.
- **Songs:** Teach students songs about the weather in **Kreol Morisien** (e.g., "Guet kouma lapli tonbe" or "Soley"). Encourage students to learn these songs and perform them, integrating **local culture** and language.
- **Rhythm and Movement:** Create rhythms that represent different weather patterns (e.g., slow tapping for rain, fast beats for wind). Students can move their bodies to match the rhythms of the weather, connecting music and movement.

7. Scientific Literacy

Objective: Investigate weather phenomena and their impact on the environment.

Activities:

- **Weather Forecasting:** Introduce basic **weather forecasting** concepts, explaining how **meteorologists** predict weather patterns in Mauritius. Discuss the science behind **cyclones**, **rainfall**, and the **water cycle**.
- **Clouds and Rain:** Study different types of **clouds** (e.g., cumulus, nimbus) and how they form **rain**. Use simple experiments to demonstrate the **water cycle** and how **condensation** leads to precipitation in Mauritius.
- **Local Flora and Fauna:** Explore how weather conditions in Mauritius affect **local plants** and **animals**. For example, discuss how **tropical plants** thrive in the humid weather, or how certain animals adapt to the seasonal changes in temperature and rainfall.

Proposed Activities

1. Mauritian Weather Chart (Numeracy & Scientific Literacy)

- **Objective:** Track daily weather and analyze patterns specific to Mauritius.
- **Activity:** Create a weather chart with symbols for common weather in Mauritius. Track and graph the weather for a week, analyze the data, and draw conclusions about the most common weather during that period. This involves **data collection**, **graphing**, and **scientific observation**.

2. Mauritian Weather Dress-Up (Lifeskills)

- **Objective:** Learn how weather in Mauritius affects clothing choices.
- **Activity:** Have students dress up or draw themselves in outfits suitable for different weather conditions in Mauritius (e.g., light clothes for sunny days, raincoats for cyclones). Discuss how **weather** influences **daily life** and **health** in Mauritius.

3. Rain Gauge Experiment (Numeracy & Scientific Literacy)

- **Objective:** Measure and track rainfall in Mauritius.
- **Activity:** Make a simple rain gauge, collect rainwater, and measure the rainfall. Students calculate and discuss the impact of rainfall on the environment, including the effect on local **agriculture**.

Integration of Languages

- Students will practice **English**, **French**, and **Kreol Morisien** throughout the activities by reading, writing, speaking, and listening. Vocabulary related to the weather, such as **sun**, **rain**, **clouds**, **wind**, and **cyclones**, will be introduced and used in different contexts.

This **cross-curricular approach** engages students in understanding the weather in Mauritius, connecting subjects like **Numeracy**, **Scientific Literacy**, **Art and Design**, and **Music** with real-world experiences. It fosters not only academic learning but also an appreciation for **local culture**, **safety**, and **environmental awareness**.

Through this theme the teacher will be able to:

- Discover the artistic talents of students through the different activities
- Identify what students appreciated the most in the theme
- Record the level of participation of students

Sample 'Student Progress Card' after completing the theme

Name of student.....

	Not Attained	Partially Attained	Attained
Can identify horizontal lines			
Can identify vertical lines			
Can identify inclined lines			
Can draw horizontal lines			
Can draw vertical lines			
Can draw inclined lines			
Can differentiate between sunny , windy and cloudy weather			
Can read the 12 months of the year			
Can write the 12 months of the year on his own			

4. Key aspects of Theme 3: Patriotism

The first school term coincides with the independence day celebration and this provides a unique opportunity to exploit a number of concepts, from knowing the history of Mauritius to citizenship values and consolidation of the element of patriotism.

English	French	Kreol Morisien
public holiday	congé publique	konze piblik

12 march 1968	12 mars 1968	12 mars 1968
flag	pavillon	pavion moris
independence	indépendance	lindepandans
republic	république	repiblik
chief guest	invite d'honneur	livite doner
national anthem	l'hymne national	lim nasional
parade	parade	parad
prime minister	premier ministre	premie minis
president of republic	president de la republique	prezidan larepiblik
national celebration	célébration nationale	selebrasion nasional
cake	gateau	gato
drink	la boisson	labwason

From this list of vocabulary acquisition, what can be done?

- Sentence building in the 3 languages
- Writing and singing the national anthem
- Writing the words from memory
- Display list of words done by students in class
- Explain the significance of each colour of our national flag.
- Making a slam or poem on Independence Day
- Quiz on Mauritius (eg. Who is the President of the Republic?)

What to learn in Mathematics?

- Make flag of Mauritius according to given dimension (work with Art and Design teacher) - small flag, medium flag, big flag
- Thorough this project work student will discover rectangular shapes, measure length and breadth
- Flag can be made in different materials (Bristol paper, carton, cloth...)

What to learn in ICT?

- Design the flag on computer
- Sketch or trace the map of Mauritius and Rodrigues
- Show the district boundaries

What to learn in Art and Design?

- Prepare decoration (red, blue, yellow, green) to embellish the school yard
- Make flags of Mauritius according to dimension
- Make a colorful maquette of Mauritius with ‘papier maché’ or scrap material
- Make a puzzle of Mauritius

Through this theme the teacher will be able to:

- Discover the artistic talents of students through the different activities
- Identify what students appreciated the most in the theme
- Record the level of participation of students

Patriotism

1. Literacy-French

- **Objective:** Develop language skills through patriotic themes in French.
- **Activities:**

- **Reading:** Share stories or poems in French about the independence of Mauritius. For example, reading a French poem celebrating the cultural heritage of Mauritius or the significance of national heroes.
- **Writing:** Have students write a letter to the people of Mauritius in French, expressing their love and pride for the country and its independence.
- **Speaking & Listening:** Students can recite a patriotic poem or song in French, and engage in a discussion about the independence of Mauritius in French, promoting both language and cultural appreciation.

2. Literacy - Kreol Morisien

- **Objective:** Express patriotism in the local language.
- **Activities:**
 - **Writing:** Students can write a short story or poem in Kreol about the contributions of their family to the country's progress or a celebration of a national holiday.
 - **Speaking:** Organize a class discussion or debate in Kreol on the importance of unity in Mauritius, using local expressions and vocabulary.
 - **Music:** Students can create a patriotic song or chant in Kreol that they can perform, encouraging a deeper connection with their national language.

3. Literacy - English

- **Objective:** Use English to express national identity and pride.
- **Activities:**
 - **Writing:** Have students write a poem about their vision of Mauritius (how they would wish it to be in the future), focusing on its multicultural identity and shared values.

- **Speaking & Listening:** Organize a class presentation in English about the importance of national holidays like Independence Day, emphasizing their significance for the unity of the country.

4. Numeracy

Objective: Use mathematical concepts to explore national identity and pride.

Activities:

- **Flag Proportions:** Study the proportions of the Mauritian flag and have students measure and create their own versions, calculating the area of different sections and the total flag area.
- **Population Statistics:** Discuss the population distribution of Mauritius across different regions. Have students calculate population percentages; Use bar graphs and pie charts to compare the population of different regions (creating the opportunity to use large numbers).
- **Holiday Calculations:** Calculate how many national holidays are observed each year. Have students track the dates and calculate how much time is spent celebrating national holidays compared to working days.

5. Digital Literacy

- **Objective:** Use technology to explore and share patriotic content.
- **Activities:**
 - **Research:** Students use online tools to research the history of the independence of Mauritius and the national heroes involved.
 - **Create a Presentation:** Students design a digital poster or slide presentation about a Mauritian hero or national symbol, incorporating images and text to share their findings.
 - **Interactive Quiz:** Create an online quiz to test their knowledge on national symbols, heroes, and history, promoting learning through technology.

6. Scientific Literacy

- **Objective:** Link national pride with environmental knowledge and conservation.
- **Activities:**
 - **Mauritian Flora and Fauna:** Discuss how the unique biodiversity of Mauritius, like the extinct dodo and endemic species, contributes to national pride and environmental responsibility.
 - **Weather & Agriculture:** Explore the climate of the island and how it supports local industries, especially agriculture (e.g., sugarcane and tropical fruits), which is vital to the economy of the country.

7. Citizenship Education

- **Objective:** Foster a sense of responsible citizenship.
- **Activities:**
 - **Rights & Responsibilities:** Teach students about their rights as citizens of Mauritius and their role in preserving the independence and unity of the country.
 - **Community Service:** Encourage students to take part in a local clean-up or a community service project, emphasizing their contribution to the nation's well-being.
 - **Discussions:** Hold discussions on what it means to be a citizen of a multicultural country, emphasizing equality, respect for diversity, and active participation in society.

8. Lifeskills and Values

- **Objective:** Promote values such as unity, respect, and national pride.
- **Activities:**
 - **Mauritian Heroes:** Research the life histories of key Mauritian leaders and heroes and discuss their values (e.g., resilience, courage, and unity).

- **Cultural Diversity:** Explore how the various cultural communities in Mauritius (e.g., Creole, Indian, Chinese, and Franco-Mauritian) contribute to the nation's identity. Discuss how diversity strengthens unity.

9. Physical Education and Health

- **Objective:** Foster teamwork and unity through sports and physical activities.
- **Activities:**
 - **Patriotic Relay Races:** Organize relay races where students compete in teams, symbolizing unity and collective effort for the nation's progress.
 - **Cycling for Unity:** Create a biking event that encourages teamwork, with students cheering for each other, reinforcing the idea of unity.
 - **Sports History:** Teach students about Mauritius' achievements in sports like football and volleyball, explaining how these sports bring the country together.

10. Art and Design

- **Objective:** Encourage creative expression through national symbols and themes.
- **Activities:**
 - **Flag Design:** Students create their version of the Mauritian flag and explain its symbolism in a class discussion.
 - **National Symbols Collage:** Create a collage using symbols like the national flower (Trochetia) or the dodo and explain their cultural significance.
 - **Cultural Art:** Explore the traditions of local arts, such as Séga, Ragga and have students create art representing these cultural expressions.

11. Drama

- **Objective:** Use drama to explore and celebrate national history and identity.
- **Activities:**

- **Patriotic Skits:** Organize a short skit about a key moment in the history of Mauritius, such as Independence Day or the Republic Day, encouraging students to take on roles of historical figures.
- **National Holiday Reenactment:** Students could reenact the Independence Day celebrations, including speeches or cultural performances that reflect the diversity of Mauritius.

12. Music

- **Objective:** Use music to explore national pride.
- **Activities:**
 - **National Anthem:** Teach the Mauritian national anthem, explaining its history and meaning. Students can then perform it as a class.
 - **Traditional Music & Dance:** Introduce traditional Mauritian music styles such as Ségga and Reggae. Have students perform these songs or dances to showcase local heritage.
 - **Patriotic Songs:** Encourage students to compose or perform a patriotic song, reflecting the pride and unity of Mauritius.

Integration & Reflection:

After completing the various activities, students can reflect on how different subjects contributed to their understanding of the national pride of Mauritius. For instance, they might create a **cross-curricular project** that integrates **Literacy, numeracy** and **Art and Design**, such as a **timeline of the journey to independence** with illustrations and graphs representing data about the country's development over time. This project could incorporate their knowledge from **Digital Literacy, Art and Design, Numeracy, and Citizenship Education**, providing a comprehensive approach to their learning.

Through this cross-curricular plan, students will deepen their understanding of the national identity of Mauritius while developing key skills in communication, creativity, teamwork, critical thinking, and analysis.

Sample “Student Progress Card” after completing the theme

Name of student.....

	Not Attained	Partially Attained	Attained
Can sing the national anthem			
Can copy the national anthem			
Can measure rectangle according to given dimension			
Knows the significance of each color of the national flag			
Can read the national anthem			
Can participate in a quiz			

5. Key aspects of Theme – Road Safety

Suggestions given by Road Safety Panel

- Basic road furniture (handrails, traffic lights, traffic signs, road lamps, dustbins) and features (colour of the road, road markings, overhead foot bridges, green spaces)
- Good behaviour when using the school bus
- Good practices when walking on the road which has:
 - A footpath
 - No footpath
 - A footpath on the left hand side only

Suggestions from Technical Team

English	French	Kreol Morisien
No entry	Entrée interdite	Pa gagn drwa rantre
Do not turn left	Ne tourne pas a gauche	Pa tourn agos
Do not turn right	Ne tourne pas a droite	Pa tourn adrwat
No parking	Parking interdit	Pa gagn drwa arete
Single yellow line	La ligne jaune	Lalign zonn
Double yellow line	Double ligne jaune	Doub lalign zonn
Yellow box	Boite jaune	Bwat zonn lor sime
Accident	accident	Aksidan
Driving	conduire	Kondir
License	license	Lisans
Fatal accident	Accident fatal	Aksidan fatal
Do not drink and drive	Ne pas boire et conduire	Pa bwar kan kondir

From this list of vocabulary acquisition, what can be done?

- Sentence building in the 3 languages
- Matching exercises (pictures and words where possible)
- Writing the words from memory
- Display list of words done by students in class
- Find photos showing accident and discuss about it.
- Discuss ways to prevent road accidents

What to learn in Mathematics?

- Project work: make road signs in carton then explain
- Which shapes are being used?
- Significance of road signs in a circle; road signs in a triangle etc...
- Sketch a road plan and show yellow lines

Intervention of Road Safety Unit in schools, if possible

What to learn in ICT?

- Make the road signs on computer
- Research record statistics on number of accident involving cars, bus, vans, human beings etc... and make a spreadsheet per month.

What to learn in Art and Design?

Sensitization campaign at school on road safety through posters and banners done by students.

Make colorful banners to be displayed in school

Talk by Road Safety Unit at school if possible

Through this theme, the teacher will be able to:

- Discover the likes and dislikes of students through the different activities
- Identify what students appreciated the most in the theme
- Record the level of participation of students

Student learning card after completing the theme

Name of student.....

	Not attained	Partially Attained	Attained
Is able to recognize road signs			

Is able to explain the road signs			
Is able to list some factors causing accident			
Can do a sensitization with peers on road safety			
Able to re-create road signs on a material (eg carton)			

6. Key aspects of Theme - Les Métiers du Sport

1. Introduction to Mauritian Sports Careers

Subjects Involved: English-Literacy, French-Literacy, Kreol Morisien/ AL, Lifeskills, Digital Literacy, Citizenship Education

Activity: Students research sports careers in Mauritius, such as football coaches, kitesurf/badminton instructors, and sports journalists covering events like the Mauritius Football League, kitesurfing championship or the Africa AirBadminton Championships.

- **English-Literacy/French-Literacy/Kreol Morisien:** Prepare and present a report or poster about each career, highlighting the role, skills, and local relevance.
- **Digital Literacy:** Use the internet to research careers, collect images, and create a digital presentation.
- **Citizenship Education:** Understand the value of local sports professionals in promoting national pride and community cohesion.

Objective: Introduce students to various sports professions in Mauritius and their significance to the community.

2. Mauritian Sports Career Role-Play

Subjects Involved: English, French, Kreol Morisien Drama, Physical Education, Lifeskills

Activity: Students role-play different sports careers, such as a coach for the Mauritius National Football Team or a sports journalist covering the Grande Régate.

- **French-Literacy/English/ Kreol Morisien:** Write a short script for the role-play and practice communication skills in the three languages.
- **Drama:** Develop improvisational skills and portray different characters related to sports professions.
- **Physical Education:** Incorporate physical activities like warming up as a coach or analyzing a game as a commentator.

Objective: Encourage creativity, teamwork, and communication while exploring Mauritian sports careers.

3. Maths and Mauritian Sports Equipment

Subjects Involved: Numeracy, Science, Lifeskills

Activity: Students calculate the cost of sports equipment for local sports like football, netball, or pétanque. They can also calculate the quantity of equipment needed for the local league or estimate how much water is needed for a school sports event.

- **Numeracy:** Perform calculations related to costs, quantities, and measurements.
- **Scientific Literacy:** Investigate the materials used for sports equipment and their environmental impact.
- **Lifeskills:** Apply budgeting and planning skills in a practical context.

Objective: Apply maths skills to real-life sports scenarios relevant to Mauritius.

4. Sports, Health and Nutrition in Mauritius

Subjects Involved: Scientific Literacy, Health Education, French, Lifeskills

Activity: Students explore the role of nutritionists and physiotherapists in Mauritian sports. They can design a healthy Mauritian meal (e.g., chicken curry with rice and vegetables) for an athlete or create a recovery plan for a local player after an injury.

- **Scientific Literacy:** Study the role of nutrition and recovery techniques in sports.
- **Health Education:** Understand the importance of physical and mental health for athletes.
- **French-Literacy/English-Literacy/ Kreol Morisien:** Write a short report or presentation in French/English/ Kreol Morisien describing an athlete's diet and recovery plan.

Objective: Understand how sports health professionals support athletes in Mauritius.

5. Writing a Sports Career Report on Mauritian Athletes

Subjects Involved: French-Literacy, English-Literacy, Kreol Morisien, Digital Literacy

Activity: Students research famous Mauritian athletes (e.g., Bruno Julie/Richarno Colin in boxing or Stephan Buckland/Eric Milazar in athletics) and write a detailed report about the athlete's career, the role of coaches, and how their profession impacts Mauritius.

- **French-Literacy/English-Literacy/Kreol Morisien:** Write a report on the athlete's achievements and the significance of their career in the local and international context.
- **Digital Literacy:** Use online tools to gather data and images for the report.

Objective: Develop writing skills while learning about the achievements of local sports figures.

6. Organizing a Mauritian Sports Event

Subjects Involved: Numeracy, Lifeskills, Art, Music, Physical Education

Activity: Students plan and organize a school sports event like a mini-Olympics or a local football tournament. They can calculate costs, design promotional materials (like posters), and create a schedule for events. Students may also explore traditional Mauritian games like *Lamarel* or *Tina* and incorporate them into the event.

- **Numeracy:** Calculate event budgets, the number of items required, and how to optimize resources.
- **Art/Music:** Create visual and auditory promotional materials, such as posters and a theme song.
- **Physical Education:** Organize and participate in the sports activities, applying principles of teamwork and fair play.
- **Lifeskills:** Practice project management, teamwork, and leadership.

Objective: Learn the logistics behind organizing a sports event while practicing math, art, music, and teamwork.

Integration of Cross-Curricular Elements:

- **Values:** Each activity promotes values like teamwork, leadership, perseverance, and respect for others, which are essential in sports and broader life contexts.
- **Music/Arts:** Students can engage in creating the visual and auditory aspects of sports events (such as composing chants or designing posters), fostering creativity and cultural appreciation.
- **Citizenship Education:** Students gain awareness of how sports contribute to national identity and social harmony in Mauritius, understanding their role in the community.
- **Physical Education:** Integrating sports with physical activity helps students understand the importance of fitness, health, and teamwork.

This cross-curricular approach ensures a holistic understanding of sports careers, equipping students with skills in multiple disciplines and a deeper connection to Mauritian culture and society.

Sports activities adapted to the Mauritian context:

1. Maths Relay Race

- **Description:** Students run in a relay race and solve maths problems about local topics (like distances between towns or sports facts) to move ahead.
- **Objective:** Combine sports with Maths in a fun way.

2. Mauritian Sports History Role Play

- **Description:** Students research a popular sport in Mauritius (like football or basketball) and act out its history and evolution.
- **Objective:** Learn about local sports history through role-playing.

3. Mauritian Island Obstacle Course

- **Description:** Set up an obstacle course inspired by the landscape of Mauritius, such as running like on the beach or jumping over “mountains.”
- **Objective:** Link sports with local geography in an exciting way.

4. Create Team Logos with Local Symbols

- **Description:** Students design team logos using Mauritian symbols like the dodo or the national flower.
- **Objective:** Combine art and sports with a local touch.

5. Traditional Games "Coach and Players"

- **Description:** Students play local games like sapsi way, zwe dam, *lamok devire* and *batt larou bisiklet*, with coaches guiding them on strategies.
- **Objective:** Learn teamwork and leadership through local games.

6. Mauritian Sports Quiz

- **Description:** A quiz about popular sports in Mauritius, including local athletes and major events.
- **Objective:** Test sports knowledge in a fun, competitive way.

7. Sports Emotions Game

- **Description:** Students act out emotions linked to sports achievements, like pride or frustration, inspired by local athletes.
- **Objective:** Understand emotions in sports while learning about Mauritian athletes.

8. Mauritian Dance and Sport

- **Description:** Students learn a *sega/ local* dance and add movements from sports like running or jumping.
- **Objective:** Combine dance and sport while celebrating Mauritian culture.

Other suggestions

A pool of sport professionals to visit these students to talk about their experiences and job prospects.

7. Key aspects of Theme - Les Métiers de la Cuisine

1. Introduction to Careers in Mauritian Cuisine

Subjects Involved: English-Literacy, French-Literacy, Kreol Morisien, Digital Literacy, Citizenship Education

Activity:

- Students explore different careers in Mauritian cuisine, such as chefs, sous-chefs, pastry chefs, and food critics. They research popular local dishes (e.g., dholl puri, briyani, mine frire, gateau pima) and the professionals who prepare them.
- **English-Literacy/French-Literacy/Kreol Morisien:** Prepare a report or presentation in any of these languages, using culinary terminology and local expressions.
- **Digital Literacy:** Research online to gather information about careers in the Mauritian food industry, using digital tools to create a presentation or infographic.
- **Citizenship Education:** Understand the importance of food careers in contributing to local culture and the economy. Discuss how chefs and food critics impact the local community and national pride.

Objective: Develop language skills and an understanding of the various career options in Mauritian cuisine and their cultural significance.

2. Role-Play Mauritian Kitchen Careers

Subjects Involved: French-Literacy, Drama, Culinary skills, Life Skills

Activity:

- Students role-play different kitchen careers, such as a chef preparing traditional Mauritian dishes (e.g., boulettes, briyani) or a food critic tasting and evaluating local cuisine.
- **French:** Use French culinary terms and food-related expressions while acting out the roles.
- **Drama:** Practice acting, improvisation, and public speaking skills, as students portray kitchen professionals (e.g., chefs, food critics).
- **Culinary skills:** Simulate actual kitchen tasks like meal preparation, planning, and cooking while applying hygiene and safety standards.
- **Life Skills:** Develop teamwork, communication, and leadership skills as students work together in the role-playing activity.

Objective: Build creativity, communication, and teamwork while exploring different careers in Mauritian cuisine.

3. Maths and Cooking Ingredients

Subjects Involved: Maths, Life Skills

Activity:

- Students calculate the amount of ingredients needed for a traditional Mauritian dish based on the number of servings (e.g., rougaille, vindaie poisson). They also convert units of measurement (e.g., grams to kilograms).

- **Math:** Practice basic mathematical operations such as addition, subtraction, multiplication and division and unit conversions in the context of cooking.
- **Life Skills:** Develop budgeting and planning skills by calculating ingredient costs for a dish.

Objective: Apply maths in practical culinary scenarios, enhancing problem-solving skills and the understanding of cooking principles.

4. Food Hygiene and Safety in Mauritian Kitchens

Subjects Involved: Health Education, Citizenship Education

Activity:

- Students explore food hygiene and safety, focusing on practices like washing hands before cooking, storing food correctly, and preventing contamination. They research food safety rules specific to Mauritius (e.g., handling tropical fruits and seafood).
- **Health Education:** Emphasize the importance of maintaining good health practices in the kitchen to prevent foodborne illnesses.
- **Citizenship Education:** Discuss the role of food safety in the community and how it contributes to public health.

Objective: Foster an understanding of food hygiene and safety principles, critical for maintaining health in the kitchen.

5. Writing a Recipe

Subjects Involved: English-Literacy/French-Literacy/Kreol Morisien)

Activity:

- Students write a recipe for a traditional Mauritian dish (e.g., cari poul or gato patate), providing detailed instructions and tips on cooking techniques. They describe how the dish represents Mauritian culture.
- **French-Literature/English-Literature-/Kreol Morisien:** Use the appropriate language to write the recipe, incorporating cooking verbs and culinary terms.

Objective: Enhance writing skills and learn how to communicate recipes effectively in multiple languages, highlighting cultural diversity.

6. Organizing a Mauritian Food Festival

Subjects Involved: Numeracy, Art, Digital Literacy, Music, Life Skills, Physical Education

Activity:

- Students organize a food festival to showcase traditional Mauritian dishes. They plan logistics such as costs, quantities of ingredients, event scheduling, and promotional materials (e.g., posters, menus). They can invite local chefs to share their expertise.
- **Numeracy:** Calculate the cost of ingredients, total servings, and other logistics such as the amount of food to prepare for the event.
- **Art:** Create promotional posters, menus, and decoration for the food festival using design skills.
- **Digital Literacy:** Use digital tools to manage tasks such as budgeting, scheduling, and designing promotional materials (e.g., Canva for poster design, Google Sheets for cost calculation).
- **Music:** Create a theme song or playlist for the festival that reflects Mauritian culture, integrating traditional music elements.
- **Life Skills:** Develop project management skills by organizing the event, including tasks such as budgeting, coordinating with others, and teamwork.
- **Physical Education:** Incorporate physical activity by planning games or cooking demonstrations during the festival, promoting health and wellness.

Objective: Apply cross-curricular skills in event planning, while connecting food, culture, and teamwork in a real-world scenario.

Integration of Cross-Curricular Elements:

- **English-Literacy, French-Literacy, and Kreol Morisien:** Students engage with different languages by presenting findings, writing recipes, and interacting in role-plays. This promotes multilingualism and cultural awareness.
- **Digital Literacy:** Researching, creating digital presentations, and managing the event using tools like Google Docs, Sheets, Canva, and social media to promote the food festival.
- **Scientific Literacy:** Studying food chemistry and nutrition in the context of cooking and food safety.
- **Life Skills:** Activities like organizing events, calculating costs, and role-playing kitchen jobs promote practical life skills, including teamwork, planning, and communication.
- **Values:** Emphasis on collaboration, respect for local traditions, food safety, and maintaining health and hygiene in food preparation.
- **Art and Music:** Students create visual promotional materials and develop musical elements for the food festival, exploring their creative side.
- **Drama:** Role-playing kitchen jobs develops students' expressive communication, acting, and presentation skills.

- **Physical Education:** Organizing physical activities or cooking demonstrations promotes health and wellness within the food festival.
- **Citizenship Education:** Exploring the importance of food careers in the local community and understanding how food connects individuals to culture and national identity.

This cross-curricular approach provides a holistic view of Mauritian cuisine while engaging students in a variety of subjects, preparing them for future careers and instilling important life skills.

Culinary activities adapted to the Mauritian context:

1. Mauritian Recipe Exploration

- **Activity:** Students research and create a simple Mauritian dish, like *dholl puri* or *gato pima*. They follow the recipe, measure the ingredients, and prepare the dish in small groups.
- **Objective:** Learn about traditional Mauritian dishes while practising basic cooking skills.

2. Taste Testing - Local Dishes

- **Activity:** Students taste different Mauritian snacks (like *samoussa*, *boulette* or *paow*) and rate them based on taste, texture, and presentation. They can discuss which ingredients are used in each dish.
- **Objective:** Explore local cuisine and learn about flavors and ingredients common in Mauritian cooking.

3. Cooking Math: Recipe Scaling

- **Activity:** Students adjust a traditional recipe (such as *cari poulet*) to serve more or fewer people. They calculate the new amount of ingredients needed for different portions.
- **Objective:** Apply Maths skills to cooking by scaling recipes.

4. Kitchen Hygiene Demonstration

- **Activity:** Students learn the importance of kitchen hygiene, including hand washing, cleaning surfaces, and safe food handling. They can role-play different hygiene practices in a Mauritian kitchen.
- **Objective:** Teach students the basics of food safety and hygiene specific to a tropical environment like Mauritius.

5. Creating a Mauritian Dish Poster

- **Activity:** Students pick a Mauritian dish and create a poster that includes the recipe, ingredients, and a picture of the dish. They can present their posters to the class.
- **Objective:** Develop creativity and presentation skills while learning about Mauritian food culture.

6. Food Waste Awareness

- **Activity:** Students learn about the importance of reducing food waste. They can discuss how to use leftover ingredients to make another dish (e.g., using leftover rice to make *briani* or *riz frit*).
- **Objective:** Promote sustainability and waste reduction in the kitchen.

Other suggestions

A pool of food professionals to visit these students to talk about their experiences and job prospects.

3. Key aspects of Theme - Les Métiers autour de la Musique

1. Introduction to Mauritian Music Careers

Subjects Involved: English-Literacy, French-Literacy, Kreol Morisien, Digital Literacy, Citizenship Education

Activity:

- Students research various careers in the Mauritian music industry, such as musicians, sound engineers, music producers, and concert organizers.
- **Languages:** Students present their findings using **English, French, or Kreol Morisien**, utilizing music-related vocabulary in each language.
- **Digital Literacy:** Use digital tools (e.g., Google Slides, Canva) to create visual posters or digital presentations about each career, incorporating multimedia elements like audio clips of different music genres.
- **Citizenship Education:** Discuss the role of music in Mauritian society and its cultural importance, focusing on how music brings people together and supports local identity and values.

Objective: Help students understand music careers in Mauritius and how they impact the local culture and community.

2. Role-Play Music Industry Careers

Subjects Involved: English-Literacy, French-Literacy, Kreol Morisien, Drama, Music

Activity:

- Students role-play various jobs in the Mauritian music industry. They could portray a sega singer, sound engineer, or music promoter while using music-related terminology in French or English.
- **Drama:** Practice acting skills, improvisation, and role-playing while taking on the personas of different music professionals.
- **Languages:** Use **French or Kreol Morisien** in their role-plays, incorporating industry-specific terminology such as “concert,” “production,” “mixage,” and “scène.”

Objective: Develop communication, acting, and language skills while gaining insight into music industry careers.

3. Music and Maths: Budgeting for a Concert

Subjects Involved: Numeracy, Digital Literacy, Citizenship Education

Activity:

- Students calculate the costs of organizing a concert or music event in Mauritius. This includes expenses for renting sound equipment, hiring musicians, and marketing.
- **Numeracy:** Work on mathematical operations such as addition, subtraction, multiplication, and percentage calculations to manage budgets.
- **Digital Literacy:** Use spreadsheet tools (e.g., Google Sheets, Excel) to track and organize budget calculations.
- **Citizenship Education:** Discuss the impact of organizing music events on local economies and communities. Students explore how concerts can promote cultural identity and foster community engagement.

Objective: Apply Numeracy and Digital literacy skills to a real-world, music-related scenario.

4. Mauritian Music History and Careers

Subjects Involved: Music, Languages, Life Skills and Values

Activity:

- Students learn about famous Mauritian musicians (e.g., Ti Frère, Kaya) and their contributions to Mauritian music. They research the different careers in the music industry, such as composers, performers, and sound engineers.
- **Music:** Study the evolution of Mauritian music genres (e.g., sega, seggae) and analyze how these genres reflect the culture of the country.
- **Languages:** Write reports or create timelines in **French-Literacy**, **English-Literacy**, or **Kreol Morisien** about these musicians and the careers involved in their music production.
- **Life Skills and Values:** Explore the values of perseverance, creativity, and cultural pride through the study of these musicians' careers and their contributions to Mauritian society.

Objective: Connect the history of Mauritian music to the various professions in the music industry, while instilling values of cultural pride and respect.

5. Designing a Music Album Cover

Subjects Involved: Art, Music, Digital Literacy

Activity:

- Students design an album cover for a Mauritian music artist or band. They integrate local symbols or cultural elements related to genres like sega, rap, or jazz.
- **Art:** Focus on visual design, using colors, shapes, and symbolism that reflect Mauritian culture.
- **Music:** Understand how album artwork can represent an artist's music style, message, and identity.
- **Digital Literacy:** Use graphic design software (e.g., Canva, Adobe Spark) to create digital album covers, allowing students to explore creative and technical tools.

Objective: Develop creativity and understand how visual design plays a key role in the music industry.

6. Writing a Song or Poem

Subjects Involved: Languages, Music, Literacy

Activity:

- Students write a song or poem inspired by Mauritian culture, drawing on local themes such as nature, family, or festivals. The lyrics can include elements of **Kreol Morisien, French-Literacy, or English-Literacy**.
- **Music:** Experiment with rhythm, melody, and structure in the lyrics, connecting their creative writing with musical composition.
- **Literacy:** Focus on language use, poetry, and songwriting skills. Students can perform their song or poem for the class to explore verbal expression and communication.

Objective: Enhance literacy, creativity, and music skills by composing original songs or poems that reflect cultural identity.

Integration of Cross-Curricular Elements:

- **Languages (English-Literacy, French-Literacy, Kreol Morisien):** Students will be involved in research, presentation, and creative writing in these languages, promoting multilingualism and understanding of the music industry's vocabulary.

- **Digital Literacy:** Digital tools will be employed to create presentations, posters, spreadsheets, and music-related designs, enhancing students' technological and creative skills.
- **Scientific Literacy:** Apply basic scientific principles (e.g., sound waves, acoustics, equipment functionality) during activities like budgeting for concerts, designing album covers, or understanding sound engineering.
- **Life Skills and Values:** Students will develop skills in teamwork, creativity, problem-solving, and project management. They will also explore values such as perseverance, community, and cultural pride through the study of music careers.
- **Music:** Students will deepen their understanding of music theory, history, and production, learning about different genres of music and how they shape culture.
- **Drama:** Role-playing music industry careers will develop students' acting, improvisation, and presentation skills.
- **Art:** The design of album covers connects visual arts with music, allowing students to express creativity through both media.
- **Citizenship Education:** Discussions about the impact of music on society and the importance of preserving cultural heritage will foster an understanding of students' roles as citizens in a globalized world.
- **Physical Education:** If linked to organizing events or music festivals, students could learn about the physical requirements of event management or incorporate dance and physical activities associated with music performances.

This approach integrates a wide range of subjects, making the learning experience holistic, engaging, and relevant to the students' lives while also emphasizing the importance of cultural and artistic expression.

Musical activities adapted to the Mauritian context:

1. Learning to Play Traditional Mauritian Instruments

- **Activity:** Students learn to play a basic rhythm on Mauritian instruments like the *ravanne* or *triangle*. They can practice simple beats that are used in *sega* music.
- **Objective:** Familiarize students with traditional Mauritian instruments and rhythms, developing their understanding of local music.

2. Mauritian Song Karaoke

- **Activity:** Students choose a popular Mauritian song, such as songs by *Ti Frère*, *Kaya*, *Cassiya*, and sing along in a karaoke-style session. They can practice the lyrics in *kreol* or French.
- **Objective:** Improve language skills and understanding of Mauritian music culture while having fun with singing.

3. Creating a Traditional Mauritian Melody

- **Activity:** Students create their own simple melody using instruments like the *piano*, *guitar*, or even traditional instruments. They can use a basic *sega* or *seggae* rhythm as inspiration.
- **Objective:** Foster creativity and introduce students to composition using elements of Mauritian musical genres.

4. Exploring Mauritian Music Genres

- **Activity:** Students listen to different Mauritian music genres, such as *sega*, *seggae*, etc...and then identify the instruments and rhythms used. They can discuss how these genres reflect Mauritian culture.
- **Objective:** Develop listening skills and deepen knowledge of Mauritian music traditions.

5. Sega Dance and Rhythm

- **Activity:** Students learn the basic steps of the *sega* dance, which is a key part of Mauritian culture. They can also practice clapping rhythms to accompany the dance.
- **Objective:** Combine movement and music, engaging students physically while teaching them about Mauritian dance traditions.

6. Music and Maths: Rhythm Patterns

- **Activity:** Students create rhythm patterns using claps or drums. They can break down simple rhythms into fractions (e.g., quarter notes, eighth notes), linking maths concepts with music.
- **Objective:** Apply maths concepts like fractions while learning basic music rhythms.

Other suggestions

A pool of local artists to visit these students to talk about their experiences as artists.
