

al-Battānī — Geographical Gazetteer

Regions and cities, with ecliptic-frame coordinates

Source. al-Battānī's coordinates as established in C. A. Nallino's critical edition (*Opus Astronomicum*, Pars II, 1907): the table of *regional mid-points* (*Tabula mediorum punctorum regionum*, after Ptolemy's *Geography*) and the table of *city* longitudes/latitudes (*Tabula latitudinum et longitudinum urbium*). Longitude is reckoned from the Fortunate Isles; latitudes are northern unless noted. Identifications follow Nallino's apparatus (Ptolemy / al-Khwārizmī / Lelewel). – marks a cell still to be collated.

I. Regions (94 in the source; 93 transcribed) *Tabula mediorum punctorum regionum — al-Battani world map by Ptolemaic province*

#	Name / identification	Long.	Lat.
1	Hibernia (Iuernia)	13° 0'	58° 30'
2	Britannia (Albion)	20° 0'	54° 0'
3	Hispania Baetica	9° 20'	38° 20'
4	Hispania Lusitania	8° 0'	39° 20'
5	Hispania Tarraconensis	11° 0'	42° 0'
6	Gallia Aquitania	18° 0'	45° 30'
7	Gallia Lugdunensis	20° 40'	48° 2'
8	Gallia Belgica	26° 50'	47° 1'
9	Gallia Narbonensis	22° 0'	44° 30'
10	Germania Magna	34° 0'	52° 0'
11	Raetia and Vindelicia	32° 30'	46° 30'
12	Noricum	36° 0'	46° 0'
