

SGA 2: Application to the Fundamental Group

Bounded source-aligned working unit — 20 July 2026

Authority and boundary. Corrected French TeX lines 3536–3540; original printed p. 120, source-PDF physical p. 104, and recomposed running p. 96. Remark 3.7 and blank line 3535 are excluded. Blank line 3541 and the transition on line 3542 are excluded. The raw continuation cursor is line 3541 and the next substantive cursor is line 3542. The Latin-1 authority remains byte-exact; the same-edition PDF is manifestation/layout evidence only. Independent review and archive handoff have not been performed; this package is internal and not for release.

Corollary 3.8. — *Let A be a noetherian local ring. Assume that $\text{depth } A \geq 2$. If $\hat{A}$ is pure, then A is pure.*

Proof. This follows from Lemma 3.5 and Lemma 3.6.
