

Ernst Steinitz – Reader Guide and Status

Modern LaTeX Manuscripts Project, 2026-06-04

Current front-facing readers

This record contains paired German source transcriptions and English working translations for selected Steinitz material from 1894, 1897, 1899, 1901, 1910, and 1911. The 1894 dissertation on configurations and construction is now complete in both German and English working readers.

Source-only material

The 1905 one-sided-polyhedron paper remains source-only in this release. A 1912 source slice for the second paper on rectangular systems and modules in algebraic number fields is now included as source-only material for the next transcription/translation pass.

Pending work

- Transcribe and translate the 1905 one-sided-polyhedron paper.
- Locate source for the 1906 Euler polyhedron-relations note.
- Locate source for the 1908 *Beitraege zur Analysis Situs* item.
- Transcribe and translate the 1912 Rectangular Systems II source slice.

Provenance

The compact source/witness package is 80 `Ernst Steinitz - TeX Source Scan Witnesses and QA Packet - Corpus 17.zip`. It preserves TeX, TXT, source scans/source PDFs, render checks, checksums, and package notes.
